

Edge Biomedical Job Description

Title: Biomedical Technician II

Reports To: Director of Operations

Travel Required: 75% locally, 25% regionally

Location: Orlando, FL

Education Required: Associates in Elec Science or equivalent experience

Summary:

Biomedical Technician II oversees the complete operation of the Orlando, FL remote office. The BTII must be able to work independently while providing a high level of service and professionalism. They perform and document preventive maintenance and repair of general, specialized and/or high-tech medical equipment and systems. The BTII must demonstrate a working knowledge and use of required test equipment and the electronics, including pneumatic, hydraulic and mechanical knowledge and skills. They also interpret and effectively utilize service manuals, schematics and other applicable service information required to perform and document preventive maintenance and repair of medical equipment and systems, as assigned, in accordance with established SOPs (standard operating procedures).

Essential Duties and Responsibilities:

- Identify and win new business for the FL market.
- Performs complex troubleshooting and repairs on designated modality, while working within the established procedures.
- Use proper methods and techniques to perform testing, calibrations, preventive maintenance and repair.
- Instruct customers and staff in applications and operations of the equipment.
- Submit timely and accurately; service reports, time sheets, expense reports, film badges and other paperwork as assigned. Maintain the daily back order report, cycle count and shipping needs of the facility.
- Other projects as assigned.
- Travel will be required locally and regionally as needed. Travel to TN based corporate office may be required from time to time.
- Ability to be a self-starter and manage your own work to meet the needs of our customers.
- Proper care and maintenance of company vehicle.

Qualifications:

- Associates degree in Electronics or completion of DoD Biomedical Equipment Repair School or equivalent experience.
- Minimum of 3 years of experience in the repair and maintenance of medical equipment.
- CBET or additional technical certification is strongly preferred.

Skills/Experience Required:

- Excellent internal and external customer relations and interpersonal skills. Must be able to develop and maintain cooperative working relationships with customers and co-workers at all levels within the company.
- Knowledge of technical aspects of electronic equipment and its operation, repair, and maintenance.
- Knowledge of the application of software and how it interfaces with medical equipment, test equipment and other programs (CRM and POS).
- Knowledge of current regulatory requirements.
- Knowledge of basic anatomy and physiology as applied to use of biomedical equipment.
- Knowledge of color code conventions used in component and wiring marking.
- Ability to analyze, repair, and test electronic equipment.
