Florida Biomedical Society

Symposium 2016

December 8 –10
Disney's Yacht Club Resort

FBS 2016 Symposium Schedule

December 8 -10, 2016

Thursday:

1:00pm to 4:30pm—Registration
6:15pm to 9:00pm -Early arrival event at Dewey's Sports to support Tyler's Hope

Friday:

7:00am to 6:00pm—Registration
7:00am to noon - Golf Tournament at Hawk's Landing Golf Course
7:30am to 3:30pm – Educational Tracks
Noon to 4:00pm – Exhibit Hall Vendor Setup
4:30pm to 6:30pm – Exhibit Hall Grand Opening
7:00pm to 8:30pm – Vendor Reception (Lakeside)

Saturday:

7:00am to 3:30pm—Registration
7:00am to 7:45am – Morning Reception / Continental Breakfast
7:45am to 8:00am – President's Address
8:00am to 8:30am – Keynote Speaker (Don Allen)
8:30am to 9:00am – FBS Awards & Scholarships
9:00am to 9:30am – Break
9:30am to 12:15pm – Education Tracks
12:15pm to 3:30pm – Exhibit Hall Open (Lunch with Vendors)
3:30pm to 4:30pm - Vendor Exhibit Hall Breakdown
3:45pm to 5:00pm – Educational Tracks
6:00pm to 6:45pm – FBS's Epcot Event - meet at EPCOT's International Gateway at 6:15 pm
7:00pm to 8:30pm - Epcot's Living Seas Event (Sponsored by A.I.V.)
8:30pm to 9:30pm – Epcot's Illuminations- EPCOT, Lakeside in France (Sponsored by CETech)

Sunday:

9:00am to TBD - FBS Board Meeting

Hotel Information

Disney's Yacht Club Resort

1700 Epcot Resorts Boulevard

Lake Beuna Vista, FL 32830

(407) 934 7000

Enjoy the elegant yet family friendly atmosphere at one of **Disney's deluxe resort hotels**. Delight in the formal grace of a grand New England-style yacht club at this lakeside hotel. Relax in the inviting elegance of a plush lobby replete with nautical touches, explore the whimsical Stormalong Bay and rent a variety of watercraft from Bayside Marina. Sharing many amenities with its pastel-toned sister, Disney's Beach Club Resort, Disney's Yacht Club Resort is walking distance to Epcot and a convenient boat ride to Disney's Hollywood Studios.

Other Hotel Choices

FBS attendees can take advantage of our special room rates at two other Disney Hotels. The Deluxe Resort Hotel, Animal Kingdom Lodge or Value Resort Hotel, Pop Century Resort. Attendees will need to arrange for transportation to the Yacht Club for FBS education and events. Complementary self-parking is available at all three hotels.

Reserve your hotel room using the link below

Special room rates available for FBS attendees.

Resort Reservations

https://aws.passkey.com/event/14761476/owner/70576/home

Disney's Animal Kingdom Lodge

2901 Osceola Parkway
Lake Buena Vista, Florida 32830
(407) 938-3000

Step into the heart of Africa at this magnificent Resort hotel. Inspired by the traditional African *kraal*, the horseshoe-curved design provides spectacular views of 4 lush savannas that over 200 hoofed animals and birds call home. Delight in dazzling pool areas, exciting animal programs and one of the largest collections of African art in the United States as you experience your own African safari adventure with a touch of Disney magic.

Disney's Pop Century Resort

1050 Century Drive
Lake Buena Vista, Florida 32830
(407) 938-4000

Experience the unforgettable fads of the 1950s through the 1990s all over again. From yo-yos and Play-Doh® to Rubik's Cube® and rollerblades, this Resort hotel salutes the timeless fashions, catch phrases, toys and dances that captivated the world through the decades.

Networking Events

Thursday Evening Event

6:15pm to 9:00pm

If you are arriving for the symposium on Thursday, don't miss an opportunity to spend a fun evening with your fellow FBS friends and support a good cause at the same time. We will meet at the Yacht Club at 6:15 pm Thursday, December 8. A $35 minimum donation cost includes transportation, food ,drinks, games and prizes. FBS will donate all proceeds to Tyler's Hope.

Tyler's Hope for a Dystonia Cure

LEARN MORE

REGISTER

Friday Afternoon Exhibit Hall Grand Opening

4:30pm to 6:30 pm

In the Yacht club's Grand Harbor Ballroom

Experience hands on demonstrations of new products and services

Meet vendors face to face and develop personal connections

See the latest Technologies on display

Friday Golf Tournament At Hawks Landing

7:00am to 1:00pm

Includes: Private shuttle transportation, green fees, use of electric golf cart w/ GPS, pre-round practice balls, lite breakfast, buffet lunch and prizes.

SIGN UP FOR GOLF

Friday Evening Vendor Reception Lakeside at the Yacht Club

7:00pm to 8:30pm

Join FBS Exhibitors and Attendees for a warm welcoming reception beside the lake - Sponsored by USOC.

FBS will present the President's award. This award was created to recognize a vendor, OEM or ISO. That has distinguished themselves in the Florida Biomedical Community by providing outstanding service, supporting of Biomedical societies, educational outreach and humanitarian aid and support to communities in need.

Networking Events

Saturday Morning Reception

7:00am to 9:00am

FBS's breakfast reception will begin at 7:am in the Yacht Club's Asbury Hall. There will be an address from the FBS President at 7:45. This will be followed by the Keynote address by Don Allen. FBS will present awards for our BMET of the Year and chapter's nominees. The Kevin Joyce, Bob White, Bruce McGuire and Bill Yandell scholarship awards will also be presented

Keynote Address 8:00am

Don Allen
Director of Clinical Engineering
Mercy Clinical Engineering Services
Mercy Hospital of Joplin, Missouri

Keynote Speaker, Don Allen Director of Clinical Engineering at Mercy Hospital, Joplin Missouri will speak about the role of Clinical Engineering in Disaster Preparedness. Challenges and lessons learned from the disastrous tornado that hit Mercy Hospital in 2011. This presentation will provide Florida's HTM professionals valuable insight on how to prepare for natural disasters.

Saturday Lunch with Vendors in the Exhibit Hall

12:15pm to3:30pm

Attendees and Exhibitors are invited to mingle in the Exhibit Hall and enjoy a buffet lunch - sponsored by Southeastern Biomedical.

Saturday Evening FBS goes to EPCOT

6:00pm to 9:30pm

We will walk from the Yacht Club and meet at Epcot's International Gateway. at 6:15pm

$29.95 per person includes park entrance, food and drinks. This is a limited capacity event. Attendees must be pre-registered and have wristband to attend.

7pm Cocktail party at Epcot's Living seas – sponsored by AIV

8:30- 9:30pm private firework viewing and deserts in France – sponsored by CETech

Florida Biomedical Society

Educational Presentations

VALLEYLAB™ FT10 ENERGY PLATFORM

Technical Service Training

- Introduction
- FT10 Features & Benefits
- Review of Electrosurgery & Technology
- Overview & Operation
- Mechanical Design
- Principles of Operation
- Lunch break
- Teardown
- Calibration & Output Testing
- Troubleshooting
- Spare Parts & Service Support
- Summary

Friday, December 9

7:30 am - 3:30pm

Presented by
Dale Munson
Medtronic

AMX4 - Performing PM to OEM Specifications

Friday, December 9

7:30 am - 3:30pm

This course will teach the service engineer the specific adjustments, tests, and tolerances, that are covered during a PM performed to OEM specifications.

We will review the cleaning, physical inspection, mechanical maintenance, electrical checks, and HHS testing procedures, and component replacement schedules required during a PM.

We will not only review the PM procedures themselves, but also cover:

How the test/checks are performed
What tools and test equipment are required to perform system tests/checks
What are the corrective actions when the tests fail (component replacement, calibration, etc...)

Presented by:
Todd Boyland
VP, Director of Training
RSTI

Educational Presentations

Two Days of MRI Classes

MRI Basics

Friday, December 9

7:30 am - 3:30pm

AM

Introductions, History of MRI
MRI SAFETY
Physics of MRI
More Physics
Break
Intro to Subsystems
Questions and open discussion

PM

RF
Gradient
Image Recon
Magnets
Questions and catch up

MRI Coils

Saturday, December 10

9:30 am - 10:45am

Different types
Applications
Common problems
open for questions and discussion

MRI Image Quality

Saturday, December 10

11:00 am - 12:15pm

Types of Artifacts
Common causes of artifacts

Presented by:
Bruce Smith President of
Medical Systems Technologies,LLC

Educational Presentations

AEM - Evidence of Safety and Effectiveness

With all the external emphasis on cost containment, patient satisfaction scores, and healthcare quality indicators, it is hard to find any kind of balance with implementing service strategies to stay compliant with the regulations and still hit all of those targets. When challenged to do things differently, how should the decision be made about whether any service is adequate and appropriate? This session will discuss some general guidelines for conducting an overall program performance assessment and suggest ways to use that information to implement a program that you can still have confidence in.

Friday, December 9

2:15pm - 3:30pm

Presented by:
Karen Waninger
Director of Clinical Engineering for Community Health Network in Indianapolis. She has presented educational sessions at numerous regional and national conferences, is a contributing writer for TechNation magazine, and is a member of the Executive Committee of the AAMI Technology Management Council.

Remote Data Service for Ventilation and Anesthesia

- Medical devices from the Draeger Infinity Acute Care System (e.g. Evita Infinity V500, Perseus A500) can be configured for use of Remote Services.
- Remote Services utilize the Draeger Service Connect Gateway (SCG) to faciliate transporting service logs from a medical device to be analyzed. These analysis reports are then available thru Draeger's Service Connect Portal for viewing.

Using the SCG with medical devices cuts down on the time it takes to collect the logs from medical devices. Capturing logs with a USB device is no longer necessary.

Saturday, December 10

9:30 am - 10:45am

Presented by: Joe Mitura, Systems & Network Administrator and Instructor
Draeger

Educational Presentations

Power Filtration and its Impact on X-ray and Magnet Based Medical Imaging and Therapy Systems

Saturday, December 10

9:30 am - 10:45am

And 11:00am—12:15pm

Learning Objectives: At the end of this session, the attendee should understand:

1. The basic concepts of voltage sinewave quality and how sinewave quality anomalies can adversely impact equipment operation.

2. How voltage sinewave quality is monitored and the results interpreted.

3. Learn the common symptoms of sinewave quality problems.

4. Understand the different solutions approaches available..

5. Understand the concept that in Power Quality there is no "one size fits all" approach. You must select the best solution for the specific problem.

Session Description: The session content is divided into four sections:

1. The Voltage Sine Wave?

2. Define the various voltage sinewave anomalies including typical symptoms and causes:

3. Discuss how monitoring data is captured and interpreted in order to help determine an appropriate solution.

4. Introduce the various available solutions categories:

Questions and Answers

Presented by,

Ed Weiss

Applied Power Quality Solutions LLC

Educational Presentations

Operating Microscopes Basics

This class will cover the basic functions and components of surgical microscopes. Carl Zeiss, Inc. and Leica Microsystems are the 2 major manufacturers.

Saturday, December 10

9:30 am - 10:45am

PRESCOTT'S, INC.
The Future of Microsurgery

Surgical Uses:
Microscope requirements and features for use in various types of surgical procedures.

- Neurosurgery
- Eye Surgery
- ENT Surgery
- Hand and plastic surgery

Microscope Terminology:
Parts of the microscope and their components and functions will be explained
Microscope floor stand
Microscope Head
Foot Pedal

Preventive Maintenance and Cleaning:
Routine checks, testing and maintenance procedures

Troubleshooting:
This section will provide information abut many common problems and their solutions

Presented by:
Gary Lindsay
Prescott's Inc
www.surgicalmicroscopes.com

First Call Troubleshooting for Imaging

Saturday, December 10

3:45pm - 5:00pm

First call troubleshooting is as much an art form as it is a skill. In this presentation we will discuss the methods and thought processes associated with effective initial troubleshooting of medical imaging systems. Triaging system failures and determining where to focus your next steps quickly puts service providers in a position to allocate the right resources to correct the problem and return the system to service as soon as possible.

Presented by:
Dale Cover
President RSTI

Educational Presentations

Two Classes presented by Pat Lynch on Saturday

Building Credibility for the HTM Department

Saturday, December 10

9:30 am - 10:45am

Biomeds and HTM leaders are frequently heard voicing that they don't receive any respect. While this isn't entirely universal, it is close enough that the problem seems to be far more widespread than just a few ineffective managers who are bellyaching.

I believe that there is a real cultural divide between who we are in Biomed and who the strategic leaders of our hospitals are. This divide causes us to be stuck on one side, unable to cross, in all be a few rare instances.

In this talk, we'll explore the characteristics of hospital leadership, and HTM / Biomed staff. We'll look at the strengths we bring to the table, and how we can leverage those strengths to enhance our value to hospital leadership in ways that makes them see us as contributors and problem solvers in THEIR world.

FDA Updates

Saturday, December 10

11:00 am - 12:15pm

What's going on with the FDA? They asked for input back in March, April and May. But what have they done with it since then?
And what are they likely to do with it in the future?
Are they going to make my life, as a BMET, easier, or harder?
Is the cost to my hospital going up? Or down?
Am I going to have to work harder to assure that the parts, work, and equipment coming into my facility are safe and reliable?
Am I going to have to create new policies or procedure to comply with new rules that I don't even know about yet?
How do I find time to do all of these new things, while trying to keep up with the backlog of repairs and PMs that I can't seem to catch up with?
Are there some quick and easy ways to comply that won't cost me a lot of time or money, either up front, or every month as we go forward?

Come and hear as Pat Lynch collects the very latest information available, translates it into plain ole English (as opposed to FDA/government-speak), and tells you what you need to do to make everyone happy (including yourself, your boss, and your family).

Patrick Lynch
CHTM, CBET, CCE, MBA, CHTS-PW, CPHIMS

Pat is a regular contributor to 24x7 Magazine, BI&T, TechNation listserv, and Biomedtalk listserv. He recently started Biomeds Without Borders to support Biomeds in other countries (www.BiomedsWithoutBorders.com)

Educational Presentations

Minimizing Transducer Failure Through Proper Care and Early Detection

Saturday, December 10

9:30 am - 10:45am

Preventing transducer failure is incredibly important as faulty probes can compromise patient safety by impacting image quality and potentially putting patients at risk for infection. The key to preventing transducer failure is implementing proper care methods and ensuring that everyone who handles the transducer is able to identify early warning signs.

In this session, Kyle will break down a transducer so he can explain the function of each part and where failures typically occur. He will bring real-life examples of transducers in various conditions so participants can see what a damaged probe looks like, making it easier for them to identify the problem on their own. He will then demonstrate techniques for detecting common problems, such as how to detect interior probe damage by examining the exterior. Kyle will also review proper care methods and techniques to help alleviate unnecessary problems.

Attendees will learn:

1. The function of various lenses and arrays used in probes
2. Where failures typically occur and what common damages look like
3. Techniques for detecting common problems
Proper care methods and techniques

Presented by:

Kyle Grozelle

Global Education and Training Manager.

Summit Imaging, Inc

Philips Telemetry Training

Saturday, December 10

11:00 am - 12:15pm

Telemetry M2601B and M4841A

-defines the differences between M2601B and M4841A units

-Identifies all internal Circuit Boards

-Replacement of Broken Tele Case

-Use of telemetry configuration tool

-testing and QC of Telemetry devices

Presented by:

Stephen Davis

USOC

Educational Presentations

Twenty Conclusions (Warnings) – Reflections on Life and Business

Saturday, December 10

3:45pm - 5:00pm

Participants will learn about the truths, realities, perils and thrills of being in business in general and in healthcare technology management specifically.

In over 36 years in the healthcare technology management industry, Manny Roman has experienced the highs, lows and baffling events that accompany being alive, dealing with people and being in business. Traveling from the lowest levels of participation to the presidency of an organization, he has learned some hard and some easy relationships and business lessons. He will share these lessons and his conclusions with attendees with the intent to accelerate some of the good, preclude some of the bad, and minimize some of the ugly.

Presented by:

Zoll R series Defibrillator Technical Service Training

Biomed Training Syllabus

Clinical:
Basic ECG Analysis and Review

- **Device Overview**
- **External Pacing**
- **Defibrillation**
- **Synchronized Cardioversion**

Technical:

- **Daily and 12 Month PMs**
- **System Level Overview**
- **Module Level Review**
- **Problem Diagnosis**
- **Technical Self Diagnostics**
- **System Disassembly/Assembly**

Presented by:

Bruce Hallowell

Technical Training and Deployment Specialist with

ZOLL Medical.

An extraction of the Zoll Technical service training will be presented three times on Saturday

Saturday, December 10

9:30 am - 10:45am

Or 11:00am - 12:15pm

Or 3:45pm - 5:00pm

Educational Presentations

CBET Review

The brief 2 session course will cover the reasons for you to consider undertaking the CBET Exam, the value of Certification to your career, application technique, best methods to study for the test, reference materials, joining with a group. Special training materials will be supplied by the instructor. As time allows, we will actually take a trial test from the AAMI study materials. It will give you insight to how and what to study and take the test efficiently. A copy of the application will be provided.

Saturday, December 10

Part 1 **11:00 am - 12:15pm**

Part 2 **3:45pm - 5:00pm**

Presented by:
Louis (Lou) Katchis,
a founding member of the Florida Biomed Society and currently, the Treasurer. He served on both of the AAMI- BMET and CCE certification boards and the TMC board. Lou has been working in the field of Biomedical Engineering for 45 years and is currently consulting, developing policies and procedures, and instituting features in Four Rivers CMMS for Biomed and Facilities.

Asset Management for Biomedical Equipment Service

"Asset Management is a widely used term for a variety of technologies used to help companies acquire, deploy, control, track, and service assets of all kinds. One of the most poorly served areas of asset management has been related to equipment service and repair initiatives..
Until now.
Quality Medical has developed an online portal called Q-Connect to help hospitals, HME / DME, LTAC and other users of medical equipment better control their equipment when it is sent to 3rd party vendors for PM and / or repair.
No more waiting on hold for companies to give you an RMA number, advise the estimated cost of repairs, or tell you the status of your equipment. With Q-Connect, simply log-on to your account to give you compete visibility and control over all equipment sent for PM or service.
And then we take it one step further.
We will manage your complete inventory for a single flat monthly fee, giving you predictable cash outlays every month rather than a month-end surprise of thousands of dollars in PM and repair bills. The program, knows as TEC (for Total Equipment Control) gives you visibility into your equipment service program from RMA to final delivery back to your facility.
Join the digital crowd when it comes to managing your equipment online. Stop in to this information-filled presentation about the future of equipment repair.

Saturday, December 10

11:00 am - 12:15pm

Presented by:

Jim Worrell

"Leaders in Repair, Service, Rental and Sale of Respiratory & Infusion Biomedical Equipment"

Educational Presentations

CT Basics, An Introduction

What to expect from this presentation.

We will discuss;

- The overall medical purpose and use of a CT system
- A high-level overview of CT
- Principles of CT Operation
- Historical Development of CT
- Differential Characteristics of
- CT vs. X-ray
  - Chest
  - AP Skull
  - Lateral Skull
- Technical Prospects Training Overview
- Case Studies (Time Permitting)
